

Requirement Analysis
Solution Requirements (Functional & Non-functional)

Date	9 September 2026
Student Name	Burada Laxmi Sai Priyanka
Project Name	Licensed Software Installation Request Management
Maximum Marks	

Functional Requirements

FR No.	Functional Requirement	Sub Requirement
FR-1	Application Setup	Create and configure the SIRA scoped application, required tables, modules, roles, and supporting configuration.
FR-2	Request Capture	Capture requester, software name, version, department, device, business justification, and required installation date.
FR-3	Software Request	Provide a catalog item for licensed software installation with appropriate request information and software details.
FR-4	Validation	Validate mandatory fields, request details, licensing information, and required attachments before the request can be submitted.
FR-5	Approvals	Configure approval routing so software requests are reviewed before fulfillment according to organizational requirements.
FR-6	Assignment	Automatically assign approved requests to the appropriate Software Support Team for installation and fulfillment.
FR-7	Fulfillment	Create and track fulfillment tasks, update status/work notes, and complete the request after installation.
FR-8	Notifications	Send notifications for request submission, approval, assignment, progress, and completion/closure.
FR-9	Portal	Provide a user-friendly Service Portal catalog form with configured variables, UI policies, and request tracking.

FR-10	Reporting	Support monitoring and reporting of request volume, status, approval progress, fulfillment, and completion.
-------	-----------	---

Non-functional Requirements

NFR No.	Requirement	Description
NFR-1	Usability	Provide a simple, clear, and user-friendly catalog experience for submitting software installation requests.
NFR-2	Security	Use ServiceNow role-based access and scoped application controls to protect request and configuration data.
NFR-3	Reliability	Ensure request submission, validation, approval, notification, and fulfillment steps operate consistently.
NFR-4	Performance	Provide responsive catalog form behavior and timely workflow/notification processing.
NFR-5	Availability	Ensure the application and request process are available subject to the ServiceNow platform instance.
NFR-6	Scalability	Support additional software items, request types, approvers, and fulfillment teams as the solution grows.
NFR-7	Maintainability	Allow administrators to update catalog variables, UI policies, approvals, flows, notifications, and rules efficiently.
NFR-8	Data Integrity	Maintain accurate request, approval, task, status, and installation information throughout the request lifecycle.
